## 2025 ANNUAL REPORT

### QUANG NAM MINERAL INDUSTRY CORPORATION

*(Annex No. 04, Issued together with Circular No. 96/2020/TT-BTC dated November 16th 2020, by the Minister of Finance, guiding information disclosure in the securities market)*

**Company name** : QUANG NAM MINERAL INDUSTRY CORPORATION

**Stock code** : MIC

#### **I. GENERAL INFORMATION:**

##### **1. General Information:**

Tên gọi doanh nghiệp : QUANG NAM MINERAL INDUSTRY CORPORATION

Tên tiếng Anh: : QUANG NAM MINERAL INDUSTRY CORPORATION

Tên viết tắt: : MINCO

Logo : 

Headquarter Address : Ha Lam – Cho Duoc industrial cluster, Binh Phuc, Thang Binh, Da Nang

Telephone : (+84 235) 3665 022

Fax : (+84 235) 3665 024

Website : [www.minco.com.vn](http://www.minco.com.vn)

E-mail : [minco@dng.vnn.vn](mailto:minco@dng.vnn.vn)

Legal Representative : Mr. Pham Ngoc An – General Director

Business Registration Certificate No : 4000100139, issued by the Department of Planning and Investment of Quang Nam Province (now the Da Nang Department of Finance), first issued on May 25, 2005, with the 15th amendment on September 30, 2025

Charter Capital : 85.777.700.000 Dong.

##### **2. Formation and Development Process:**

###### **a. Ownership Conversion to a Joint Stock Company:**

- The company originated as the Quang Nam - Da Nang Industrial Sand Mining and Export Enterprise, established in 1984 under Decision No. 91/QĐ-UB by the People's Committee of Quang Nam - Da Nang Province;

- In 1993, the company was renamed Quang Nam - Da Nang Minerals Company, with a registered business capital of 228,000,000 VND, as per Decision No. 333/QĐ-TCNSĐT issued by the Ministry of Industry;

- In 2000, the company changed its name to Central Industrial Company under Decision No. 1459/QĐ-UB issued by the People's Committee of Quang Nam Province;

- In 2004, Quang Nam Mineral Engineering Joint Stock Company was established through the equitization of the state-owned enterprise (Central Industrial Company) under Decision No.

5078/QĐ-UB dated December 9, 2004, issued by the People's Committee of Quang Nam Province;

- On May 25, 2005, the Company officially began operating as a joint stock company under Business Registration Certificate No. 3303070128 (now changed to 4000100139) issued by the Department of Planning and Investment of Quang Nam Province on May 25, 2005, with a charter capital of 4.5 billion VND, of which the State's capital portion accounted for 51%.

**b. Stock Listing and Charter Capital Growth:**

- April 2007: The Company increased its charter capital from 4.5 billion VND to 12.5 billion VND (issuing an additional 800,000 shares to restructure business capital and meet the 10 billion VND charter capital requirement for listing registration at the Hanoi Stock Exchange)

- June 2007: The Company increased its charter capital to 12.95 billion VND (issuing 45,000 shares to pay a portion of the 2006 dividend);

- The company was listed on the Hanoi Securities Trading Center under Certificate No. 29/GCN-TTGDHN on December 18, 2007, with the stock ticker MIC, officially trading on December 21, 2007;

- In September 2008, the company increased its charter capital to 14.8924 billion VND (issuing 194,240 shares to pay the 2007 dividend). On November 7, 2008, it officially registered additional securities: 194,240 shares;

- On October 22, 2009, the company completed an issuance of 1,009,412 shares (496,412 shares as bonus shares from surplus capital and 513,000 shares issued to three strategic shareholders). On February 11, 2010, it registered additional securities for the second time: 496,412 shares. On December 30, 2010, it registered an additional 513,000 shares;

- On March 25, 2011, the company completed an issuance of 2,987,394 shares (including 424,629 shares for the 2009 dividend at a 17% ratio, as per Resolution No. 01NQ/-ĐHĐCĐ2010 dated May 29, 2010, and 2,562,765 shares sold to existing shareholders (2,446,515 shares) and company employees (116,250 shares) under Article 5 of Resolution No. 01NQ/-ĐHĐCĐ2010 of the 2010 Annual General Meeting of Shareholders, as part of Phase I capital increase to 56 billion VND);

- On May 26, 2011, the company officially registered additional securities for the fourth time: 2,987,394 shares (under Decision No. 219/QĐ-SGDHN dated May 17, 2011). On May 28, 2014, the Hanoi Stock Exchange issued Decision No. 278/SGDHN regarding the delisting of Quang Nam Mineral Engineering Joint Stock Company's shares;

- On July 16, 2014, the 2014 General Meeting of Shareholders resolved to privately issue 58,900 shares to SCIC to offset debt capital (as per Official Letter No. 7285/UBCK-QLPH dated December 31, 2014, from the State Securities Commission of Vietnam).

- As of 2015, the company had a total of 5,544,946 shares in circulation, corresponding to a charter capital of 55,449,460,000 VND, with 5,514,621 shares trading on UPCOM/HNX.

- On December 26, 2024, the Hanoi Stock Exchange issued Decision No. 1270/QĐ-SGDHN approving the listing of Quang Nam Mineral Engineering Joint Stock Company's shares

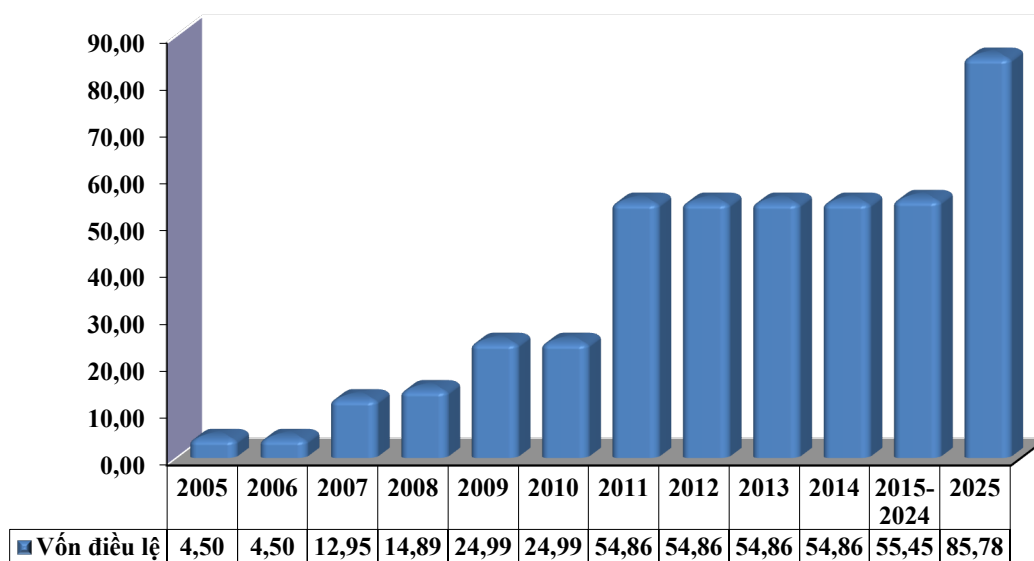

- On March 11, 2025, the Hanoi Stock Exchange issued Announcement No. 937/TB-SGDHN regarding the first trading day of the listed shares of Quang Nam Mineral Engineering Joint Stock Company under the ticker MIC, with a total of 5,544,946 listed shares.

- On March 19, 2025, MIC shares were officially launched for trading on the Hanoi Stock Exchange

- July 07, 2025: The Board of Directors passed Resolution No. 10/NQ2025-HDQT approving the implementation of a share issuance plan to pay the 2024 dividend. Number of shares to be issued: 3,033,041 shares, par value: 10,000 VND/share, exercise ratio: 100:55. The number of issued shares will be rounded down to the nearest whole unit, and any arising fractional decimal shares will be canceled.

- September 10, 2025: The Hanoi Stock Exchange issued Decision No. 1087/QD-SGDHN approving the supplementary listing of shares for Quang Nam Mineral Industry JSC. Number of supplementary listed shares: 3,032,824 shares; Issuance method: Issuing shares to pay the 2024 dividend; Total number of listed shares: 8,577,770 shares.

#### INCREASE IN CHARTER CAPITAL FROM 2005 TO 2025 (*Billion Dong*)

### 3. The main activities of the Company:

NO	INDUSTRY CODE	INDUSTRY NAME
1	0899 (Main)	Other Mining Activities Not Elsewhere Classified Details: Mining, processing, and trading of minerals (except prohibited minerals)
2	0990	Support Activities for Mining and Quarrying Details: Investment consulting on mineral activities and mine design
3	4663	Wholesale of Construction Materials and Other Installation Equipment
4	4932	Other Passenger Land Transport
5	4933	Freight Transport by Road
6	6810	Real Estate Business, Ownership, and Leasing of Land Use Rights Details: Leasing warehouses, manufacturing facilities, and office spaces
7	7110	Architectural and Related Technical Consultancy Activities Details: Geological exploration

8	2310	Manufacture of Glass and Glass Products
9	2392	Manufacture of Building Materials from Clay
10	0210	Forestry Planting and Care
11	1311	Manufacture of Yarn
12	1313	Finishing of Textiles

#### 4. Business and Production Areas:

Currently, the Company operates primarily in Thang Binh district, Que Son district, and Dai Loc district of Quang Nam province (now Thang Binh commune, Xuan Phu commune, and Ha Nha commune of Da Nang city).

#### 5. Main Product Portfolio of the Company:

✓ White silica sand is produced from high-quality quartz sand and is widely used in various industries, including:

- ◆ Float glass and construction glass manufacturing;
- ◆ Glass packaging production
- ◆ Solar panel coated glass production
- ◆ Molding and casting
- ◆ Liquid glass production.

✓ Low-iron quartz sand is a key raw material for industries such as solar panel coated glass manufacturing, semiconductor production, and electronic microchip fabrication. Currently, Minco has completed the testing phase and is accelerating production.

✓ Silica powder is produced from high-quality quartz sand and is widely used in various industries, including:

- ◆ Ceramics and high-end construction materials production
- ◆ Paint manufacturing and agricultural chemical production
- ◆ Detergents, desiccants, and deodorizers
- ◆ Applications in the chemical industry.

✓ Feldspar products are among the essential materials for various industrial manufacturing sectors. In particular, it is the primary raw material for:

- ◆ The production of artificial granite tiles and ceramic tiles.
- ◆ Ceramic glazes for the ceramics and glass industries, as well as industrial fillers and medical applications...
- ◆ Glass manufacturing...
- ◆ Additives in paints, plastics, elastomers, polishing powders (both in powder and liquid detergent forms), and welding rod coatings.

✓ For many years, feldspar products from Minco have been well received in the market. This has been a driving force for the company to further invest and develop in this field, bringing high value to the nation's precious natural resources.

## 6. Notable Awards:

Time	Title	Awarding Organization
2000	Third-class Labor Medal	President of Vietnam
2003	Gold Medal: Foundry Sand Product	Vietnam International Trade Fair – VIETNAM EXPO 2003
2004	Golden Globe Award at the Vietnam High-Quality Goods Fair 2004	Vietnam High-Quality Goods Fair 2004
2004	Gold Medal: TTB Sand Product (59-62) at the Vietnam High-Quality Goods Fair 2004	Ministry of Industry & Ministry of Science and Technology
2004	Gold Medal: Silica Powder BTA#200 and BTA#325	Ministry of Industry & Ministry of Science and Technology
2005	Gold Medal: Processed TTB Sand Product (44-48); Silica Powder BTA#400	Vietnam International Trade Fair – VIETNAM EXPO 2005
2005	Certificate of Merit for "Exemplary Compliance with Tax Policies in 2005"	(Decision No. 280/QD-TCT dated March 28, 2006, by the General Department of Taxation)
2007	Two Gold Medals: Foundry Sand Product and Silica Powder BTA#325	International Industrial Fair organized by the Ministry of Industry in Ho Chi Minh City, June 2007
2007	Certificate of Merit for "Outstanding Achievement in Tax Compliance in 2007"	(Decision No. 868/QD-KT dated February 28, 2008, by the People's Committee of Quang Nam Province)
2008	Certificate of Merit for "Exemplary Compliance with Tax Policies in 2008"	(Decision No. 388/QD-TCT dated April 20, 2009, by the General Department of Taxation)

2009	Certificate of Merit for “Outstanding Contribution to Quang Nam Province’s Industrial Development Over the Years”	(Decision No. 1618/QĐ-UBND dated May 19, 2009, by the Chairman of the People's Committee of Quang Nam Province)
2009	Certificate of Merit for “Excellent Business Performance and Significant Contributions to the Vietnamese Business Community in 2009”	(Decision No. 3800/PTM-TĐKT dated December 23, 2009, by the Chairman of the Vietnam Chamber of Commerce and Industry)
2009	Certificate of Merit for “Significant Achievements in Business Operations Contributing to Socioeconomic Development Over the Years”	(Decision No. 1090/QĐ-UBND dated April 1, 2010, by the Chairman of the People's Committee of Quang Nam Province) at the Outstanding Industrial and Trade Enterprises Conference of Quang Nam for the period 2005-2009
2010	Certificate of Merit for “Active Contributions to the Development of the Vietnamese Business Community in 2010”	(Decision No. 3883/PTM-TĐKT dated December 20, 2010, by the Chairman of the Vietnam Chamber of Commerce and Industry)
24/02/2011	Quang Nam Mineral Industry Joint Stock Company was ranked among the Top 500 Fastest Growing Enterprises in Vietnam in 2010, as announced by Vietnam Report and VietnamNet ( <a href="http://www.fast500.vn">http://www.fast500.vn</a> )	
22/10/2022	Quang Nam Mineral Industry Joint Stock Company was honored in the Top 10 Enterprises with Outstanding Asia-Pacific Brands in 2022	
05/09/2025	Quang Nam Mineral Industry Joint Stock Company was granted certificates for its Quality Management System – ISO 9001:2015; Occupational Health and Safety Management System – ISO 45001:2018; and Environmental Management System – ISO 14001:2015 by BSI Vietnam Co., Ltd

## **8. Development orientations:**

### **a. General Orientation:**

Focus all resources and solutions to stabilize and strengthen production and business operations. Restructure the production and business activities towards a leaner model and concentrate on developing mainly in areas related to white sand products, with a focus on deep processing to create many products with high technological content and economic value, increasing the competitiveness and reputation of the Company in the context of both domestic and global economic conditions, which still pose many challenges to businesses.

### **b. Main objective of the Company:**

- Enhance the efficiency of production and business activities, striving to create an internal accumulation rate, gradually developing capital to ensure economic benefits for shareholders and investors; maintain and stabilize employment for employees, and increase average income for workers annually;

- Resolve legal issues related to the mine, increase the extraction capacity of white sand and groundwater. Continue to address the outstanding issues related to Chinese investors, extend the mining license for Trảng Thạch mine to continue implementing the Company's goals and strategies;

- Closely monitor the quality of processed sand products, ensuring the implementation of the policy from the Quảng Nam Provincial People's Committee.

- Focus on consolidating and changing the approach to domestic and export markets to stabilize and enhance the consumption of the Company's key products.

### **c. Development strategies in medium and long term:**

- After completing the application for adjusting the mining license and increasing the mining and processing capacity of white sand, study projects for deep processing products from white sand to enhance the added value of the products, extend the lifespan of the mine, increase production efficiency, and ensure the Company's long-term development plan, in line with the Government's policy on national mineral reserves.

- Continue to seek joint ventures and partnerships with domestic and international partners; seek investment in new product processing to implement the product diversification strategy.

- Collaborate with domestic and foreign entities to invest in building a factory to produce sodium silicate, white carbon, or high-value products from glass sand raw materials.

### **d. Corporate objectives with regard to Corporate environment, society and community Subtainbility:**

The Company complies with current regulations in environmental protection activities, post-mining restoration, contributes funding to support local infrastructure development, and effectively participates in charitable social activities in areas where the Company's subsidiaries and affiliates are operating.

## **9. Risk factors:**

The war between Russia-Ukraine, USA-Israel and Iran not only causes energy prices to skyrocket but also undoubtedly impacts a wide range of social and economic issues. Therefore, the business operations of the Company will certainly face significant negative effects from the following challenges

**a. The Russia-Ukraine, USA-Israel and Iran War:**

In late February 2022, Russia launched a full-scale war against Ukraine. This conflict has led to indirect support for Ukraine from many Western countries and the US, causing global instability with uncertain consequences. In the short term, energy prices and precious metals (such as gold) are rising sharply, leading to higher prices for goods and services, particularly transportation costs and logistics expenses. This is disrupting the global market. This risk poses a high danger, especially in the consumption and export of white sand, which will face numerous obstacles.

On February 28, 2026, the United States and Israel launched a joint large-scale military airstrike against Iran, marking a severe escalation in Middle Eastern tensions. Within just 24 to 48 hours following the strike, oil futures surged sharply amid concerns that Iran might disrupt supply or threaten the strategic shipping route through the Strait of Hormuz—a chokepoint for approximately 20% of globally traded oil. International airlines simultaneously rerouted their flights, Middle Eastern stock markets experienced severe volatility, and investors flocked to safe-haven assets (gold).

As oil prices settled above \$100 per barrel—up from \$70 prior to the conflict—gasoline prices in the U.S. are nearing the \$4 per gallon mark, reaching their highest level since Russia launched its military campaign in Ukraine in 2022.

For Vietnam—a net energy importer with an annual turnover of approximately \$17 billion for petroleum products, liquefied petroleum gas (LPG), and crude oil—the direct impact is unmistakably clear. Since the beginning of 2026, global oil prices have risen by roughly 30%, creating upward pressure on domestic fuel prices. This affects not only consumers but also cascades into higher costs for production, transportation, and logistics.

**b. Financial Capacity:**

In previous years, the Company operated ineffectively, resulting in limited accumulated resources to cope with macroeconomic policy instability and market fluctuations. The Company's financial resources are still tight, which reduces its competitiveness.

**c. Mineral Resource Management Policies**

The Vietnamese government will adopt many significant policies in the management of mineral resources, aiming to prevent waste, protect the environment, and enhance the value of resources. The government's export policy for silica sand is unstable, leading to significant disadvantages, such as customers losing confidence in Vietnam's sand export policies and seeking more stable partners. With this situation, the future of silica sand exports could face many difficulties or even come to a halt. This risk may cause the Company to lose its main export advantage.

**d. Increased Costs for Environmental Rehabilitation and Local Support**

Amid financial difficulties, the requirement to pay an environmental rehabilitation and restoration deposit of tens of billions of VND for the Huong An white sand mine places immense pressure on the Company

**e. Increased Taxes:**

The export tax on white sand has increased from 17% to 30% since January 1, 2013, and the resource tax has increased from 13% to 15% since July 1, 2016. Whether these taxes will continue to rise in the future is an ongoing risk.

**f. Increased Input Costs:**

The costs of environmental rehabilitation, resource taxes, and environmental fees are rising and account for a significant proportion of the mining costs, especially for white sand. This unfavorable factor reduces the Company's competitiveness compared to other companies in the same industry across the country. The Company will definitely struggle to mine effectively if it only exports white sand through preliminary processing.

In 2025, the increase in fuel and energy prices significantly affects internal transportation costs, sales expenses, and production service costs.

**II. Operations in 2025:**

**1. Situation of production and business operations:**

**a. Impacts and Challenges:**

In 2025, the Company has basically secured a stable supply of white sand, with favorable weather conditions and minimal rainfall. The increased capacity of processing equipment has also ensured smooth mining and production operations. However, the Company still faces several significant challenges and impacts:

- The Company has been experiencing severe financial imbalances for many years. Working capital for production mainly relies on bank loans, and cash flow circulation remains slow.

- Legal procedures related to the Hương An white sand mine and the Đại Lộc feldspar mine remain incomplete:

- + For the Hương An white sand mine: The adjustment of the implementation period for the mineral mining investment project has not yet been completed in accordance with regulations.

- + For the Đại Lộc feldspar mine: The Ministry of Natural Resources and Environment has issued a decision approving the mine closure plan under License No. 994, but the renewal procedure for License No. 995 remains incomplete, preventing the Company from resuming feldspar mining.

- The prices of raw materials and repair costs, including electricity and spare parts, continue to rise. Fees related to environmental protection, mineral and groundwater resource taxes, land lease payments, and contributions to local infrastructure development have also increased significantly.

- The government's policies on mineral mining, processing, and environmental protection are becoming increasingly stringent, significantly impacting the Company's mining operations

**b. Performance Results of 2025 Compared to 2024:**

No	Indicator	Unit	Actual 2024 1	Planned 2025 2	Actual 2025 3	Comparison of Actual 2024 with	
						Actual 2024 4=3/1	Planned 2025 5=3/2
1	Net Revenue	1.000 Dong	230.404.048	218.815.371	189.417.399	82%	87%
2	Total Expenses	1.000 Dong	213.420.577	201.241.232	187.089.710	88%	93%
3	Profit before taxes	1.000 Dong	16.983.471	17.574.139	2.327.689	14%	13%
4	Profit after taxes	1.000 Dong	10.434.583	14.059.311	1.466.422	14%	10%

5	Average Outstanding Shares	Shares	5.514.621	8.547.445	8.547.445	100%	100%
6	Earnings Per Share (EPS)	Dong/shares	1.892	1.645	172	14%	10%
7	Major Product Sales Volume						
	Processed Sand (all types)	Tons	345.837	336.000	300.299	87%	89%
	Fiberglass Fabric and Yarn	Tons	0	0	0		
	Feldspar Powder, Weathered Products	Tons	0	0	0		
8	Capital Investment	Million dongs	2.569	5.000	423	16%	8%
9	Total Salary Fund	1.000 Dong	14.913.995	14.288.554	13.750.752	92%	96%
10	Average Workforce	People	97	97	96	99%	99%
11	Average Income	(Dong/people/month)	12.812.711	12.275.390	11.936.417	93%	97%

Payment to the State and local budgets: 33.78 billion VND (17.8% of revenue)

### c. Evaluation:

In 2025, the Company encountered numerous difficulties in its production and business operations:

Legal procedures related to the mines and mining-processing activities have not yet been completed, specifically: The Company is carrying out procedures to adjust the implementation period of the mineral mining investment project before July 28, 2025, in accordance with Decision 78/QĐ-BTNMT dated January 10, 2024. Regarding the Dai Loc feldspar mine, License 995 has not yet been renewed. Currently, the Company is conducting mine protection activities; operations will resume once a new mining license is granted, and production will be deployed following new directives from the Board of Directors (BOD).

**e. Change in the owner's equity:**

- July 7, 2025: Board of Directors (BOD) Resolution No. 10/NQ2025-HDQT Re: Approval of the implementation of the plan to issue shares for the 2024 dividend payment.

- July 15, 2025: The State Securities Commission (SSC) issued Official Letter No. 3455/UBCK-QLCB Re: Reporting documents on the share issuance for dividend payment of Quang Nam Mineral Industry Joint Stock Company.

- July 17, 2025: BOD Resolution No. 11/NQ2025-HDQT Re: Approval of finalizing the list of shareholders for the share issuance for the 2024 dividend payment.

- August 11, 2025: BOD Resolution No. 12/NQ2025-HDQT Re: Approval of the issuance results, conclusion of the share issuance for the 2024 dividend payment, amendment to the Company Charter, and updating the Enterprise Registration Certificate. Total expected number of shares to be issued: 3,033,041 shares. Exercise ratio: 100:55 (a shareholder owning 1 share will receive 1 right; for every 100 rights, they will receive 55 new shares). Total number of distributed shares: 3,032,824 shares, of which: Number of shares distributed to shareholders based on the ratio is 3,032,824 shares to 855 shareholders; Number of shares handled for fractional/odd-lot shares is 217 shares (these fractional shares will be canceled). Issuance end date: August 5, 2025. Total number of shares after the issuance (as of August 5, 2025): 8,577,770 shares, of which: Number of outstanding shares is 8,547,445 shares, Number of treasury shares is 30,325 shares. Total charter capital after the issuance: 85,777,700,000 VND.

- September 10, 2025: The Hanoi Stock Exchange (HNX) issued Decision No. 1087/QD-SGDHN regarding the approval of the additional listing of shares for Quang Nam Mineral Industry Joint Stock Company.

- September 19, 2025: The Hanoi Stock Exchange (HNX) issued Notice No. 4174/TB-SGDHN regarding the first trading day of the additionally listed shares. Number of additionally listed shares: 3,032,824 shares. Official trading date: Friday, September 26, 2025.

## **7. Environmental and Social Impact Report of the Company:**

### **a. Environmental Impact:**

- Total Direct and Indirect Greenhouse Gas (GHG) Emissions:

◆ The Company currently uses various equipment such as motor vehicles, cars, drying systems, magnetic separators, etc. During their operation, a certain amount of greenhouse gases is emitted.

◆ The Company's products are distributed domestically and for export. The transportation services hired to deliver the products also indirectly contribute to greenhouse gas emissions.

- Initiatives and Measures to Reduce Greenhouse Gas Emissions:

◆ The Company is constantly improving its production processes to reduce energy, electricity, and fuel consumption per product unit, thereby minimizing greenhouse gas emissions into the environment.

◆ Trees are planted around the mining areas in accordance with the approved environmental protection plan.

- Specific Measures to Reduce Emissions:

◆ According to the approved Environmental Impact Assessment, the adjusted project for white sand mining in Huong An, Quang Nam Province (now Da Nang city) does not include the construction of gas treatment facilities. However, to reduce emissions into the atmosphere and protect public health, the Company has implemented several measures to control emissions from the project.

◆ The Company develops a reasonable mining plan, focusing operations during the dry season and suspending activities during the rainy season. Operations are completely halted on days with adverse weather conditions such as strong winds, low pressure, or storms.

◆ Sand piles are not to exceed 10 meters in height, and water is regularly sprayed to keep the white sand moist, preventing dust dispersion from both raw and finished products.

◆ The correct type of fuel is used for each type of machinery and equipment. Fuel must meet quality standards to limit the release of toxic gases into the environment.

◆ Machinery and equipment used must meet technical and environmental safety standards as regulated by the Vietnam Register. Old or outdated equipment is not used.

◆ Regular inspection and maintenance of mining machinery and equipment are conducted to ensure they meet technical requirements before operation.

**b. Raw Material Management:**

- Total Raw Materials Used for Producing and Packaging the Company's Main Products and Services During the Year:

◆ Volume of raw white sand: 182.132,3 m3.

◆ Mineral source: Licensed under Decision No. 103/QĐ/CN-CL dated November 13, 1995; Decision No. 993/QĐ-BTNMT dated July 28, 2006; Decision No. 78/QĐ-BTNMT dated January 10, 2024. Mining areas include Huong An White Sand Mine - Binh Phuc and Binh Giang Communes, Thang Binh District, and Huong An Commune, Que Son District, Quang Nam Province. (Now Thang Binh Commune, Xuan Phu Commune, Da Nang city).

- Percentage of Recycled Raw Materials Used in Production: None.

- Residues and bauxite from mineral processing are used for environmental rehabilitation at the mined-out areas, in compliance with environmental laws and approved environmental protection plans.

- Other solid wastes are collected and treated by a licensed waste treatment service provider to ensure a clean and safe production and business environment, minimizing environmental impact.

**c. Energy Consumption:**

- Direct and Indirect Energy Consumption: The primary fuels used include diesel, lubricants, and oils for machinery and equipment operations

◆ Diesel: 210.547 liters

◆ Various lubricants: 3.520 liters

◆ Electricity: 3.007.672 kWh

- Energy Saved Through Efficiency Initiatives: None.

- Reports on Energy-Saving Initiatives (e.g., providing energy-efficient products/services or using renewable energy), and Results of These Initiatives: None

**d. Water Consumption:**

- Water sources and volume used:

◆ Water supply sources: Groundwater pursuant to License No. 3051/GP-UBND dated November 2, 2020; Municipal water from Thang Binh Clean Water Enterprise; Surface water pursuant to License No. 334/GP-SNNMT dated April 26, 2025.

◆ Recycled water from the recirculation pond system.

◆ Water used for washing white sand: 83.797 m3, of which: 29.160 m3, Groundwater: 8.360 m3, Municipal water: 46.277 m3

- Percentage and total volume of recycled and reused water: Recycled and reused water accounts for 100%.

**e. Compliance with Environmental Protection Laws:**

Number of penalties for non-compliance with environmental laws and regulations: None

Total amount of fines for environmental violations: None

In 2025, the Company did not receive any inspection, audit, or official request from authorities regarding environmental matters; therefore, there were no compliance corrective results to report

**f. Labor-Related Policies:**

- Number of employees: 96, Average monthly salary: 12.275.390 VND/person/month.

- **Labor policies ensuring health, safety, and employee welfare:**

- ◆ Working hours: 44 hours/week for employees at the Company Office and affiliated unit offices, 48 hours/week for other departments

- ◆ Employees are entitled to all legal benefits such as leave, sick leave, maternity, retirement, and severance pay

- ◆ Employees also receive additional support for maternity, bereavement, birthdays, etc., with the support amount adjusted according to actual conditions

- ◆ The Company fully and promptly pays health insurance, social insurance, and unemployment insurance, and settles insurance claims as per the law..

- **Employee training activities:**

- ◆ The Company places great emphasis on training and retraining to improve management, professional expertise, political awareness, cultural knowledge, foreign language skills, and IT skills for employees, aiming to effectively serve the business.

- ◆ Encouragement and support for employees to pursue self-study and professional development.

**g. Community Responsibility Report:**

The Company always pays attention to the activities of the local communities around its mining and processing areas. Its business objectives align with social goals. Based on its financial capacity, the Company has gradually and effectively implemented social work, improved local living conditions, fostered high consensus between the business and local communities, and contributed to local economic development.

Total cost of local community support: **148,500,000 VND**

**h. Report on green capital market activities under the guidance of the SSC: None**

**III. Reports and assessments of the Board of Management:**

**1. Assessment of operating results:**

In 2025, the Company faced numerous difficulties in its production and business operations: Revenue reached 189,417,399,256 VND, achieving 87% of the set target and 82% compared to 2024 (230,404,048,106 VND). The Company focused on its key product, processed white sand, and diversified its products to meet market demands. Throughout 2025, the production of silica powder and dried sand continued to be implemented but has not yet proven effective.

**2. Financial situation:**

**a. Assets:**

Total assets as of December 31, 2025, amounted to 151,010,256,738 VND, decreasing to nearly 87% compared to 2024 (174,373,523,470 VND).

Total short-term receivables from customers were 21,266,096,307 VND, arising from receivables that are not yet due for payment. Additionally, the Company has made a 100% provision for doubtful debts amounting to 3,195,280,320 VND.

**b. Liability:**

Total liabilities amounted to 57,791,951,418 VND, a decrease of nearly 70% compared to the same period in 2024, and accounted for 38% of total capital. Of this amount, short-term

liabilities were 46,712,453,205 VND, a decrease of nearly 61% compared to the same period in 2024

**c. Owner's Equity:**

In 2025, profit after tax reached 1,466,422,442 VND. The owner's contributed capital increased by 30,328,240,000 VND due to the issuance of shares for the 2024 dividend payment.

**3. Improvements in organizational structure, policies, and management:**

In 2025, there were no changes in the company's executive management team.

**4. Development plans in future:**

**a. Financial Restructuring:**

Continue to focus on financial restructuring (including the restructuring of assets and capital) centered around white sand-related products. This aims to ensure the step-by-step recovery, stabilization, and health of our financial position, gradually bringing the capital structure back into balance and enhancing overall financial capacity.

**b. Business Operations and Market Strategies:**

- **Mining Operations:** White sand mining must always be accompanied by environmental protection and rehabilitation, especially land restoration after mining. The company strictly complies with legal regulations on mineral extraction and environmental protection... The company has completed procedures to obtain a new mining license for the Huong An white sand mine, based on the decision of the National Mineral Reserve Assessment Council. Currently, the company is negotiating with Quảng Nam authorities regarding the leasing of overlapping mining areas. For the Dai Loc feldspar mine, the company is continuing to finalize upgraded reserve approvals and apply for a new mining license under License No. 995. The company is also working on optimal tax solutions in compliance with legal regulations to maximize profitability and fulfill obligations to the State Budget.

- **Production Activities:** The company is restructuring production, investing in technological improvements to enhance productivity and reduce costs while ensuring product quality. Priority is given to technological investment that enhances the value of white sand resources and integrates commercial activities related to similar products. The company has completed machinery and equipment investments to increase production capacity to 300,000 tons/year and develop high-quality low-iron sand products (F60, F80).

- **Sales & Market Development:** The company aims to optimize its competitive advantages (relationships, experience, etc.) to reorganize and stabilize its market presence, focusing on new strategies for the domestic market.

**- Short-Term Investment Plans:**

◆ At Quang Nam Mineral Industry Joint Stock Company: Complete the investment extension for the Huong An – Que Son mine license.

◆ At Dai Loc Feldspar Company: Complete the application for a new mining license for the feldspar mine pursuant to License 995.

**5. Explanation of the Board of Management for auditor's opinions:**

- The Executive Board of the Company is responsible for ensuring that accounting records are properly maintained to accurately reflect the consolidated financial position of the Company at any given time, and to ensure that the consolidated financial statements comply with

Vietnamese accounting standards, the Vietnamese enterprise accounting regime, and relevant legal regulations on the preparation and presentation of consolidated financial statements. The Executive Board is also responsible for safeguarding the Company's assets and taking appropriate measures to prevent and detect fraud and other irregularities.

- The Executive Board confirms that the Company has complied with the above requirements in the preparation of the consolidated financial statements.

- The Board of Directors has approved the accompanying consolidated financial statements. These statements give a true and fair view, in all material respects, of the consolidated financial position of the Company as at December 31, 2025, as well as the consolidated results of operations and consolidated cash flows for the financial year then ended, in accordance with Vietnamese accounting standards, the Vietnamese enterprise accounting regime, and relevant legal regulations on the preparation and presentation of consolidated financial statements.

## **6. Assessment report related to environmental and social responsibilities of the Company**

### **a. Assessment concerning the environmental indicators (water consumption, energy, emissions, etc.)**

The Company has implemented regular environmental protection measures in 2025, specifically as follows:

- The Company invested in a water recirculation system in the white sand production process. This system is maintained and operated consistently and continuously to ensure no wastewater is discharged into the environment. The water reuse method significantly reduces water consumption, contributing to cost savings in production and business activities and minimizing the impact on underground water resources during mining.

- Periodic environmental monitoring:

- + Wastewater monitoring: According to the approved Environmental Impact Assessment Report and the approved monitoring program, the Company is not required to conduct regular wastewater monitoring or install automatic, continuous wastewater monitoring systems.

- + Groundwater monitoring: The Company coordinates with a specialized unit to conduct environmental monitoring twice per year. First round: May 9, 2025, second round: November 29, 2025. The results of the environmental quality indicators were within the permissible limits of QCVN 09:2023/BTNMT – National Technical Regulation on Groundwater Quality.

- The Company has installed mesh barriers to minimize white sand loss caused by weather conditions outside the storage area. To improve the working environment, the Company allocates a specific budget for tree planting in the production areas and office premises, contributing to better working conditions and environmental protection. Additionally, the Company regularly waters roads from the mining site to the processing plant to minimize dust and smoke in surrounding residential communities.

- Environmental rehabilitation is carried out in accordance with current mineral laws: The Company plants trees in areas where mining has been completed. This restoration work is conducted regularly and continuously and is reported periodically to the relevant authorities.

**b. Assessment concerning the labor issues**

The Company always fully ensures the rights and benefits of employees. All welfare regimes are implemented, including holidays, sick leave, maternity leave, company trips, and social insurance.

The Company provides adequate personal protective equipment for all staff, such as protective clothing, masks, gloves, and other necessary tools specific to each department. Regular training sessions on occupational safety and hygiene are organized to raise awareness among workers about the importance of technical safety. The activities of the Party and trade union organizations are supported and facilitated by the Company.

Regarding hazardous waste, the Company has designated a specific collection area while awaiting proper treatment. Green trees within the Company's premises are carefully designed and maintained, creating a clean and green landscape while contributing to a fresh atmosphere.

**c. Assessment concerning the corporate responsibility for the local community**

In 2025, the Company fully fulfilled its responsibilities toward the local communities around its mining and processing areas. The Company actively contributed financial support to help maintain local social stability in accordance with its financial capacity. These efforts have fostered strong local consensus and created a favorable operating environment for the Company's production and business activities.

**IV. ASSESSMENTS OF THE BOARD OF DIRECTORS ON THE COMPANY'S OPERATION:**

**1. Assessments of the Board of Directors on the company's operation:**

The company has strictly and fully complied with all legal regulations regarding mining laws, taxation, environmental protection, fire prevention and control, food hygiene, and workplace safety. There have been no violations or incidents of non-compliance.

**2. Assessment of Board of Directors on Board of Management's performance:**

In implementing the 2025 business plan, the Executive Board demonstrated strong determination and effort in executing the 2025 General Meeting of Shareholders' Resolutions and the Board of Directors' (BoD) Resolutions. The Executive Board has worked diligently to fulfill its responsibilities in business operations management, financial control, and income distribution. The Board proactively researched technical improvements, optimized production lines, and efficiently allocated human resources, ensuring cost savings on raw materials. Additionally, the Executive Board took proactive measures to stabilize market supply even during peak periods, revive the export market for processed sand, and secure necessary funding to sustain business operations. Efforts were also made to restructure the organization, resolve personnel and asset-related issues, and enhance core values. Furthermore, the Board has focused on improving efficiency, fostering creativity, and encouraging innovation among company employees and its subsidiaries

### 3. Plants and orientations of the Board of Directors:

In 2026, the global situation in general will continue to be unpredictable, and the Vietnamese economy also faces many challenges and potential risks. Therefore, the Company's production and business operations will inevitably encounter numerous difficulties.

To address these challenges, the Board of Directors (BoD) has set forth the following strategic directions for 2026:

- Strengthening and expanding the core business operations through investment in production expansion, product diversification, and a focus on high-quality products.

- Ensuring effective and decisive implementation of BoD resolutions regarding human resource management, investment efficiency monitoring, corporate culture, internal controls, production, finance, cost-saving initiatives, and anti-waste measures to enhance stability and efficiency.

- Further strengthening the organizational structure and key personnel, fostering a united and cohesive workforce, and implementing a clear salary and bonus policy to meet the company's practical needs. Additionally, the BoD will instruct the General Director to replace underperforming employees who fail to meet assigned responsibilities..

- Exploring new potential markets and developing flexible pricing policies to meet customer demands.

- Ensuring legal compliance in mining operations to avoid violations during inspections by regulatory authorities.

- Enhancing cash flow management, seeking low-interest capital sources, and proactively forecasting financial risks.

- Implementing modern management tools, focusing on standardizing operational procedures and internal management regulations to improve efficiency and ensure compliance with legal requirements, particularly in information security and risk management.

- Directing the organization of the Annual General Meeting of Shareholders, ensuring timely, transparent financial reporting and auditing in full compliance with current legal regulations.

## V. CORPORATE GOVERNANCE:

### 1. Board of Directors:

#### a. Members and structure of the Board of Directors:

- At the General Meeting of Shareholders on April 26, 2023, the Board of Directors for the 2023-2028 term was elected, consisting of 05 members:
